

~~SECRET~~

Assistant Director for Research and Reports

7 January 1958

THRU : Chief, Economic Research, ORR
 Chief, Materials Division, ORR

Report for the Month of December 1958

1. The possible lack of funds for proposed external research on Chicom agriculture threatens to limit seriously the research program of M/AG. Dropping negotiations at this time could also prove quite embarrassing to the Agency, inasmuch as they have been underway for some time.

3. [REDACTED], Chief M/CH, attended several meetings of a Commerce-Defense committee which is formulating plans to control the export of unpublished technical data on petrochemical plants and processes. The proposed control procedures, which are to be submitted to the Operating Committee of the interagency Advisory Committee on Export Policy, are designed to prevent the re-export of US technology from friendly countries to the Sino-Soviet Bloc. [REDACTED]'s role was advisory, and with respect to matters of fact rather than of policy.

4. Consideration is being given to establishing an annual project which will provide a brief summary of the fuels and power industries of China. Experience indicates that there is considerable consumer interest in this type of intelligence which, although included in contributions to the annual NIE, rarely appears in the IP or completed NIE.

5. A summary of Free World proved crude oil reserves was prepared for use by the DCI as background material for an OCB meeting.

6. Material on USSR production of crude oil and USSR petroleum trade with the Free World was prepared for use by the DCI in briefing a representative of CBS.

7. The JAEIC Economic Working Group is reviewing and preparing comments on the contribution of the JAEIC Fissionable Materials Working Group to NIE 11-2-59.

8. The JAEIC Economic Working Group, subsequent to submission of its contribution to NIE 11-2-59, is drafting a proposed economic section for the NIE.

12. [REDACTED] participated in the first meeting of a DD/I task force that is to survey the operations of OCR/IR. At this organizational meeting, [REDACTED] was elected chairman and preliminary plans for the task team's investigation were discussed. The group will undertake an on-the-spot study of IR functions and activities prior to the preparation of a formal report to the DD/I. A second meeting has been scheduled for mid January.

25X1X7

14. D/M is proposing that another meeting of ORR analysts and FDD supervisors be held with the aim of improving FDD support to analysts doing research on the European Satellites. St/I/D has been requested to handle the necessary arrangements.
